

Flash speed meets low cost

IBM Flash Storage : An Enabler to Hybrid Cloud

Now with hardware warranty for 4th and 5th year at NO extra cost! *

Designed for software-defined environments and built with **IBM Spectrum Virtualize** software, the IBM Storwize family is an industry-leading solution for storage virtualization.

Did you know?

IBM has been recognized as a Leader for Flash Storage in the **Gartner Magic Quadrant** for Solid-State Arrays for **3 years in a row** from 2014 to 2016.

IBM Spectrum Virtualize

IBM Spectrum Virtualize capabilities can also be extended to other storage systems you currently have.

IBM Storwize V5030F

Free 4th and 5th year hardware maintenance worth **\$12,500**

Configuration

- V5030F SFF Controller
- 16Gb FC Adapter Pair
- 6 x 800GB 2.5 Inch Flash Drive
- IBM Spectrum Virtualize for Storwize

IBM Real-time Compression™ delivers up to five times more storage capacity with outstanding performance – guaranteed.

Unlike other compression implementations, Real-time Compression is specifically designed to compress most enterprise active primary workloads such as databases, virtualization, and many other enterprise workloads.
